

School of Business programs include core and elective requirements, and some have option lists to choose from. For diploma details, students may refer to the Academic Program Progress Report (APPR) or program worksheet. An APPR can be generated through myStudentSystem. Information on how to run that report is [HERE](#).

If you are a current Bachelor of Commerce (BCOM) student and have declared your major, run an APPR report through myStudentSystem. Information on how to run that report is [here](#). Use the APPR to plan and check your enrollment and track your progress. If you want to explore what your requirements would look like if you changed programs, or to explore the various BCOM majors and minors, you can run a “What If” (WHIF) version of the APPR through myStudentSystem. Information on how to run that report is [HERE](#).

If you need help with your program plan or APPR report, you may request a program check by filling out the program check request form [HERE](#). (You must login with your MacEwan information.) You can also connect with a School of Business Academic Advisor via email at business@macewan.ca or by booking an appointment [online](#) from the link at the Contact Us on your program’s webpage. (You must login with your MacEwan information.)

The School of Business offers certificates, diplomas, and degrees. The business courses listed on the following pages are university-level – the only ones approved for the Bachelor of Commerce program of study.

The BCOM degree has core requirements, elective requirements, and specific requirements for declared majors and (optional) minors. BCOM students must take three (3) types of electives to complete the degree requirements: business, non-business, and open electives. Courses numbered 100-199 are considered junior-level and you can only have 7 junior-level electives in total, and courses numbered 200 and higher are senior-level.

A minor is optional and consists of 15 credits of senior-level coursework, which varies depending upon the minor(s) chosen. Students may select a business minor, or a minor from a different faculty (non-business). The minor courses must fit within the available elective requirements of your major.

Double-minor combinations may be available **however, a double-minor in two business areas is not available**. Limited choices for a double major. Contact a School of Business Academic Advisor for more information. A list of majors and minors can be found [HERE](#) under Academics on the BCOM website.

Diploma students must also complete electives as outlined in program plans.

Electives

There are three types of electives in School of Business programs, though not all programs require all three types. Refer to the APPR or program worksheet to learn about the number and type electives required. Courses are categorized as business, non-business and open.

Business Electives

Business Electives are business courses outside core requirements or primary major requirements. Business electives can be used to broaden general business knowledge or to develop an additional area of emphasis, such as a secondary major or a minor.

Non-Business Electives

Non-business Electives are courses that are outside the School of Business. Students may choose any baccalaureate-level course they are eligible for, from outside the School of Business.

Open Electives

Open Electives can be business or non-business courses.
