

REQUIRED JUNIOR LEVEL COURSES^{1,2}

6 CREDITS

- BIOL 107: Introduction to Cell Biology³ [FALL/WINTER]
- BIOL 108: Organisms in their Environment [FALL/WINTER]

REQUIRED SENIOR LEVEL COURSES⁴

3 CREDITS

- ONE OF THE FOLLOWING:
- BIOL 207: Principles of Genetics [FALL/WINTER]
 - BIOL 208: Principles of Ecology [FALL]

GENERAL SENIOR LEVEL COURSES^{5,6}

15 CREDITS

Within the 15 credits required to meet this minor's general requirements, a minimum of 6 credits must be completed at the 300- or 400-level.

MOLECULAR/CELLULAR BIOLOGY COURSES

- | | |
|---|---|
| <ul style="list-style-type: none"> <input type="checkbox"/> BICM 200: Introductory Biochemistry [FALL/WINTER] <input type="checkbox"/> BIOL 201: Eukaryotic Cellular Biology I [FALL/WINTER] <input type="checkbox"/> BIOL 205: Principles of Molecular Biology [FALL/WINTER] <input type="checkbox"/> BIOL 211: Introduction to Microbiology [WINTER] <input type="checkbox"/> ZOOL 241: Animal Physiology I [FALL] <input type="checkbox"/> ZOOL 242: Animal Physiology II [WINTER] <input type="checkbox"/> BICM 310: Intermediary Metabolism [NOT OFFERED 2015/16] <input type="checkbox"/> BICM 320: Structure and Function of Biomolecules [FALL] <input type="checkbox"/> BICM 330: Nucleic Acid Chemistry and Molecular Biology [WINTER] | <ul style="list-style-type: none"> <input type="checkbox"/> BIOL 300: Eukaryotic Cellular Biology II [WINTER] <input type="checkbox"/> BIOL 313: Animal Developmental Biology [FALL] <input type="checkbox"/> GENE 317: Genetics and Society [WINTER] <input type="checkbox"/> GENE 369: Genetic Analysis of Bacteria [WINTER] <input type="checkbox"/> GENE 370: Genetics Analysis of Eukaryotes [FALL] <input type="checkbox"/> BIOL 421: Techniques in Molecular and Cellular Biology [FALL] <input type="checkbox"/> GENE 400: Genome Organization [WINTER] <input type="checkbox"/> GENE 404: Genetic Regulatory Mechanisms [FALL] <input type="checkbox"/> GENE 418: Human Genetics [WINTER] |

➤ **Important! Please see the back of this page for planning notes.** ⬅

*This planning sheet should be used only as a **guide** for course planning and it should be used in conjunction with the Bachelor of Science or Bachelor of Arts degree planner. Remember: not all courses listed are offered each year and course offerings are subject to change. In the event of a discrepancy between the information presented on this sheet and that available on myStudentSystem, the information on myStudentSystem will be considered accurate.*

IMPORTANT PLANNING NOTES

1. **BIOL 107** and **BIOL 108** should be completed in the first year of a program and can be taken in either order. **BIOL 107** and **BIOL 108** can be used to satisfy core requirements in the Bachelor of Science degree.
2. Students are required to consult with the MacEwan University Academic Calendar to ensure they meet the prerequisites for all Biological Sciences courses they enrol in.
 - Some courses in this minor require prerequisites from another discipline. For example, **BICM 200** requires a minimum grade of C- in **BIOL 107**, **CHEM 101**, and **CHEM 261**. Students should consult the MacEwan University Academic Calendar.
3. The typical term in which courses are offered is indicated. All students minoring in Biological Sciences should take careful note of the terms in which courses are offered; many senior-level Biological Sciences courses are offered only once a year. For example, **BIOL 208** is only offered in the Fall term. Some senior level courses are offered in alternate years. Students should confirm course offerings with the Program Office.
 - The following Biological Sciences courses will be offered in the Spring/Summer 2016 term, dependent upon enrolment numbers: **BIOL 107**, **BIOL 108**, **BIOL 205**, **BIOL 207**, **BIOL 208**, and **BICM 200**.
4. For students interested in pursuing the Molecular Genetics stream, **BIOL 205** and **BIOL 207** should be completed in the second year of their program. For students interested in pursuing the Environmental Biology stream, **BIOL 208** should be completed in the second year of their program.
5. The Molecular/Cellular Biology and Ecology/Environmental Biology streams are suggested paths of study; they are not formal or required concentrations. Students minoring in Biological Sciences can choose a Molecular/Cellular Biology focus, an Ecology/Environmental Biology focus, or a general Biological Sciences minor.
 - Students interested in pursuing the Ecology/Environmental Biology stream are encouraged, but not required, to take **STAT 151** in their first year. While it is not a prerequisite for **BIOL 208**, it can be helpful with some of the material covered in the course.
6. Arts students who choose a Biological Sciences minor must comply with Bachelor of Science minor residency requirements. Science minors must complete a minimum of nine senior level MacEwan University credits, including a minimum of three credits at the 300- or 400-level.
7. Students may take **BIOL 495** and **BIOL 498** for credit a maximum of two times each, as long as the course topic is different each time they take either course.
