

# Student Research Day Program 2026

**April 23**

*The land on which we are gathering in Treaty Six Territory is the traditional gathering place for many Indigenous people. We honour and respect the history, languages, ceremonies and culture of the First Nations, Métis and Inuit who call this territory home.*

*The First People's connection to the land teaches us about our inherent responsibility to protect and respect Mother Earth. With this acknowledgement, we honour the ancestors and children who have been buried here, missing and murdered Indigenous women and men, and the process of ongoing collective healing for all human beings. We are reminded that we are all treaty people and of the responsibility we have to one another.*

## Welcome Notes

**Dr. Annette Trimbee, President and Vice-Chancellor,  
MacEwan University**

### ***Welcome to Student Research Day!***

Today we celebrate another milestone in student research at MacEwan, with record-breaking participation in Student Research Day across disciplines. More than 300 students will present work rooted in a wide range of undergraduate experiences—from research assistantships and volunteer work to work-integrated learning and field placements. At MacEwan, we take great pride in offering undergraduate students opportunities to engage in research that fosters connection: connecting ideas across disciplines, connecting people through mentorship and collaboration, and connecting learning to the needs of our community. Student research is a powerful driver of curiosity and discovery, encouraging students to explore meaningful questions while building the knowledge, skills, and professional relationships that support future careers. This real-world application of learning reflects our role as a teaching-focused, downtown university deeply embedded in community life. I look forward to learning how your research has shaped your self-discovery, sparked your curiosity, and contributed to understanding issues that matter. Whether you are a student, faculty mentor, or attendee, thank you for investing your time and energy, making connections, and contributing to a vibrant research community. Enjoy the day!

**Dr. Craig Monk, Provost and Vice-President,  
Academic**

To our extraordinary undergraduate researchers, congratulations on reaching this important milestone. The projects you share today reflect countless hours of dedication and exploration. Through bringing your ideas to life, you have strengthened essential skills in critical thinking, problem-solving, collaboration, and communication—skills that will serve you well in every future endeavour. My sincere thanks also go to our faculty

mentors. Your guidance not only deepens student learning but also strengthens our community impact through research and creative activity. At MacEwan, we believe that research transforms learning; it connects knowledge to action, and campus to community. Whether in the lab, studio, field, or classroom, the discoveries made here help shape a more thoughtful and engaged future.

The achievements of everyone involved remind us that curiosity, imagination, and perseverance are at the heart of what it means to be a Griffin.

**Dr. Craig Kuziemy, Associate Vice-President,  
Research**

Welcome to Student Research Day 2026, our annual capstone event celebrating student research at MacEwan. At a time when there is so much uncertainty in society, locally and abroad, the only thing that we can really control is our own destiny. Part of that is finding your passion and place in a very rapidly changing world. Regardless of what happens outside our doors, there will always be a need for curious minds

to inform and shape the society of tomorrow. The skills our students acquire through research are a key part of the life skills that will help them wherever their career ambitions and pursuits take them. I am always proud and inspired by the energy and commitment our students put into the scholarly work they will present today. It will showcase the excellent student-led scholarship across all our faculties and schools, but, more importantly, it offers a glimpse of tomorrow's inventors, entrepreneurs, workforce, and leaders, and that gives me hope for the future.

While today is about celebrating our students' scholarly achievements, I also want to give a heartfelt shout-out to the faculty members, community partners, and others who nurtured, supported, and encouraged our students. Everyone needs a helping hand sometimes. Together, we can turn curiosity into ideas and ideas into meaningful and impactful outcomes.
