Getting Started!
Bachelor of Science
2019/20 Academic Year

For general degree planner, as well as major/minor planners, visit www.MacEwan.ca/BSCStudent

What courses should I take in my first year?

We understand that knowing where to start can be challenging. This sheet has been designed to help you know where to begin: with your breadth requirements!

Breadth requirements (also called exit requirements) cover a number of disciplines and are designed to broaden your horizons and extend your skills. They also give you a grounding in a number of different fields and disciplines to help you determine your interests and strengths, which may help you decide on a major and minor. Most students complete their breadth requirements over their first 3 semesters of university.

Unless otherwise specified, these courses can be taken at any level and completed in any combination. For example, you could take EASC 101 and BIOL 107 to complete the Biology and Earth and Planetary Sciences element. Courses used to fulfill the breadth requirements can also count towards the major(s) or minor(s). In our example, EASC 101 can be used for a Physical Sciences major, and BIOL 107 can be used for a Biological Sciences major. All breadth requirement courses will count toward the 120 credits of the overall degree.

Looking for course descriptions? Check out the course lists on the Department websites (macewan.ca/arts and macewan.ca/science), the Academic Calendar (macewan.ca/calendar), and myStudentSystem. Pre-requisites are also listed in the course descriptions.

- **English** - ENGL 102 and 3 credits in ENGL (not including ENGL 108 or 111)
  - ENGL 102
  - ENGL ______

- **Chemistry or Physics** - 6 credits in CHEM or PHYS
  - _________
  - _________

- **Biology or Earth and Planetary Sciences** - 6 credits in BIOL or EASC (courses must have a lab component)
  - _________
  - _________

- **Mathematics** - One of MATH 114, MATH 120, or MATH 125
  - MATH 114, 120 or 125

- **Mathematics, Computer Science or Statistics** - 3 credits in CMPT, MATH, or STAT (not including CMPT 104, MATH 160, or MATH 170)
  - _________

- **Social Sciences** - 6 credits in ANTH, ECON, LING, POLS, PSYC, or SOCI
  - _________

- **Humanities** - 6 credits in CLAS, COMP, HIST, HUMN, PHIL, or a Language other than English
  - _________

* A single course cannot be used to fulfill more than one Breadth Requirement

How many courses should I take?

A BSc degree consists of 120 credits—36 of which are fulfilled with the breadth requirements. Each course is usually 3 credits, which means you will take 40 courses to complete your degree. If you intend to graduate within 4 years, you must take 10 courses per academic year. If you are not taking Spring/Summer courses, then you will need to take 5 courses each in Fall and Winter to complete your degree within 4 years.

However, students often take longer than 4 years to complete their degree! The maximum course load allowed per term is 5 courses, but you can take 3 courses per term and still be considered a full-time student. However, you can also take 1-2 courses per term as a part-time student. When deciding how many courses to take per term, consider your commitments outside of school as well as your academic abilities and preferences.
### How do I enroll?

You should enroll yourself in courses by logging on to myStudentSystem and clicking “My Academics.”

For step-by-step instructions and/or instructional videos on how to enroll, go to macewan.ca/bscstudent > How do I enroll myself in courses online?

### What if I need help?

All first year students should plan to attend an Academic Planning Session, where advisors will go over all of this information and more. To sign up, go to macewan.ca/bscstudent > Can I get in-person help to choose my courses?

Because we have so many students, we do not have the resources to help you build a schedule one-on-one. However, we can answer specific questions or help you troubleshoot.

For these specific inquiries, we offer drop-in advising during our office hours: Monday to Friday, 8:30am-12pm and 1pm-4:30pm in 6-211.

You can also email us at artsandscience@macewan.ca. Please email us from your mymacewan account, and include your student ID number.

### Do I need to declare a major and minor right away?

All students begin as general, undeclared Science students. Students will have an opportunity to declare their major(s) and minor(s) during our declaration period. If you have an idea of what you’d like to choose for your major and minor, check out the degree, major, and minor planning sheets, available at macewan.ca/bscstudent > How do I plan my degree? (Undeclared and Entering Fall 2017 or later)

To find out how to declare, including information on competitive majors like Psychology and Biological Sciences, go to macewan.ca/bscstudent > How do I declare my major? Keep in mind that you can always re-declare if you change your mind.

If you’d like to explore your options and see what’s available for majors and minors, pick up an Arts & Science Viewbook from Program Services (6-211).

### What are the overall degree requirements?

While the BSc is flexible, there are still a few rules that you must follow before you graduate.

- You need to complete at least 120 credits (or 40 courses) of non-duplicative coursework that can be used for the major(s), minor(s), and options. Non-duplicative means that you count each course only once.
- **A minimum** 60 credits have to be completed at MacEwan University. (For more details on the residency requirements, refer to the overall degree planning sheet.)
- A maximum of 48 credits (or 16 courses) at the 100-level is allowed.
- A minimum of 72 credits need to be from Science courses.
- A maximum of 6 credits with a final grade of D or D+ in courses credited toward the major(s) or minor(s).
- The overall Graduation Grade Point Average (GGPA) must be 2.0 or higher with a minimum GPA of 2.0 on all courses credited towards the major(s) and/or minor(s).

Up to 15 credits from courses offered by a faculty other than Arts and Science are allowed, but only 3 credits can be taken in a physical activity (PACT) course. **Students with out-of-Faculty minors are limited to Arts and Science Options only.**
